kaandemiroz@gmail.com (213) 327-4316 Los Angeles, CA

Senior Unity Engineer with 8+ years shipping and operating live mobile games

WORK EXPERIENCE

FUN-GI Games – Los Angeles, CA

Senior Software Engineer 2022 – Present

- Lead technical architecture and development of *Dodgeball Dojo*, a real-time multiplayer card game built in Unity, from inception through soft launch and global release on iOS, Android, and Steam.
- Own end-to-end implementation of core client-side gameplay systems, UI/UX flows, and meta-game progression; translate wireframes and prototypes into polished in-game features.
- Co-design server architecture and client-server contracts, contributing to back-end systems defining player data models, multiplayer match flow, and game state synchronization.
- Build reusable character and ability systems in collaboration with designers, 3D artists, and animators.
- Mentor engineers, establishing technical standards and architectural best practices.
- Optimize runtime performance and stability through memory profiling and CDN-based asset delivery.
- Support live-ops for a globally released title rated 4.6★ and featured as *Best New Game* by Apple.
- Voice the in-game character “Osman,” extending contributions beyond engineering.

Software Engineer 2021 – 2022

- Shipped major feature updates for flagship mobile title *House Flip*, a home renovation simulation game in Unity, introducing new social and gameplay systems alongside live operations.
- Developed the guild system, in-game chat, inventory management, and mini-games.
- Implemented brand integrations with Amazon and Walmart, linking physical goods to in-game perks.

Junior Software Engineer 2018 – 2021

- Developed updates for *House Flip*, including new gameplay features, content, and live events.
- Optimized Unity scene structure for improved performance and integrated third-party plugins.
- Led data migration and reworked player data and client logic to support a major scalability update.

Software Engineer Intern 2018

- Ported *House Flip* to Android, adapting platform systems for global launch.

ADDITIONAL EXPERIENCE

Personal & Academic Unity Games – Los Angeles, CA 2017 – 2018

- Developed Unity VR and multiplayer projects focused on gameplay, physics, and custom networking.

Android Developer Intern – Mobilike, Istanbul, Turkey 2015

- Built an Android video news application integrating ads, multithreading, and pagination.

SKILLS
